Food & Beverage Environmental Operations, Getting it Done.

Welcome to the 47th annual Food and Beverage Environmental Conference (FBEC) in fantastic Charleston, South Carolina! As many of you know, the tradition of the conference is to rotate the location of the conference each year between the East and West Coast. My initial plan was to throw a curve ball to this tradition by hosting the 2017 conference out West again. However, the main traditions of this conference are what make it such a great event. Plus who can complain about Charleston? There is a tremendous amount of American history found here, accompanied with southern hospitality making for great location to host the conference. I hope that you all truly enjoy your stay and have a great experience!

The conference began in 1970 by a small group of food processors who were responsible for environmental compliance. The group gathered to support one another with strategies and partnerships to meet the challenges of the Clean Water Act. Since then, the conference has grown and evolved into what it is today.

The 2017 theme was established by the entire planning committee in lieu of the challenges that the food and beverage processors face on a daily basis. Surprisingly, some of the greatest hurdles around environmental compliance activities is just 'getting it done.' Whether it's the regulators, financials, or simply finding qualified personnel, they all present a challenge in getting it done. I hope that the sessions throughout the conference provide you with the guidance and insights to support your efforts around sustainability and environmental management.

Please be sure to take advantage of the social gatherings to renew old friendships and kindle new relationships, to build your support network as you address future challenges and remember to have fun! The program and signage at the registration table will guide you to the locations of the various events throughout the week.

Lastly, the vast network and friendships I have built because of this conference are priceless. Over the past nine years that I've attended this conference I've been able to leave with invaluable information as well as new friendships.

But most importantly it takes a lot of people to put this conference together. Thus, a big thank you to Brynn, the Steering Committee, members of the Planning Committee, the speakers and poster presenters. Thank you to the many sponsors who not only attend but also provide additional financial and in-kind support to the conference.

With that, make the most of your experience and enjoy the 47th annual Food and Beverage Conference.

Sincerely,
Josh Milleson
2017 Conference Chairman

Conference Traditions

Ship's Steering Wheel

The tradition of presenting a steering wheel to the incoming chairman of the Steering Committee began as a private joke between 1996 Conference Chairman Ed Taylor of Minute Maid and 1997 Conference Chairman Stephanie Richardson of Preventative Environmental Management. At the beginning of the 1997 conference, Stephanie presented Ed, the then Steering Committee chairman, with an old car steering wheel dug out from a salvage yard, the idea being the Steering Committee Chairman needed something to steer. Ed had the last laugh as he took great pride in ceremoniously presenting the old steering wheel back to Stephanie at the end of the 1997 conference. The old car steering wheel has since graduated to a ship's wheel as a gift from Ted Weller of B&A Health and Safety Consultants. This steering wheel has been handed from the outgoing Steering Committee Chairman to the incoming Steering Committee Chairman since 1998. It is the responsibility of the outgoing Steering Committee Chairman to keep the wheel during the year of their service, engrave the name of the incoming Steering Committee Chairman on the next plate prior to the next conference and to present the ship's wheel to the next Steering Committee Chair at the Wednesday evening awards dinner.

Honey Dipper

This conference tradition began in 1970 when the most important environmental issue was wastewater. One of the traditional slang terms used to discuss wastewater is "honey wagon," which refers to pumper trucks used for septic tank pump outs. In 1977, the chairman of this conference was presented with the Honey Dipper, which recognizes the origins of the conference. To this day the conference chair receives the Honey Dipper from the outgoing conference chair and it is worn around the neck throughout the entire conference.

The Talking Stick

In 2002, the conference left the U.S. for the first time and landed in Vancouver, British Columbia, Canada, with Gottfried Haase of Kraft as the chairman. On Sunday evening the entertainment with dinner was performed by members of a native Canadian tribe. The chief of the tribe presented Gottfried with a Talking Stick, which is a native tribe tradition that recognizes who has the right to speak. The Talking Stick is displayed throughout the conference next the speaker's podium.

The Tie

Try as we may, some folks never get the message: don't wear ties. The conference dress code is business casual. In 2005, in Savannah, Ga., Bruce Wright of Basic American Foods made the mistake of wearing a tie. The portion of the tie that encircled his neck now travels with the Talking Stick, and is hung over the base as a reminder.

The Big Dog Award

The Big Dog Awards were created at the 1997 Conference by Quentin Davis of Fehr-Graham & Associates. They were originally called the MC-T awards, owing to the fact that McDonald's had sent some "Environmental T-Shirts" to the conference that were given away as prizes. The idea was borne from the 1997 conference, when several presenters added humor and uniqueness to their presentations.

Three nominees are chosen for each award and the idea is to select unique and funny comments from presentations and create categories based off the comments. The winner is announced after the category is explained. The awards are presented at the Wednesday evening awards dinner, and past categories have included: Best Lawyer Joke, Best Technical Term and Best Technical Lie. In 1998, the name was changed to the Big Dog Awards. Awards have been given every year since 1997. Award recipients receive Big Dog t-shirts.

The Little Kitten Award

The Little Kitten Award was created by Carol Kenfield, of Pillsbury in 2000. She recognized that this is more than a conference; it is a venue where life-long friendships and caring relationships are developed. The recipient of the award receives a little kitten and a certificate. The recipient is responsible for the care and upkeep of the kitten for 1 full year and for selecting the next recipient.
